Why come here?

Just 2 div's inside a container div. I used flex for this.

Danger!

Yeah, you could go to a normal place and relax... Or you could come here, where you will be endlessly thrown in to life threatening situations!

No need to be eased in gently, just walk right up to a herd of mammoths, they probably won't hurt you! Don't worry about those giants guarding them I doubt they hit very hard anyway. Did I also mention we have highly aggressive dragons that will attack you as you transverse the place? Cool as, right?

Repeat. Experiment with widths to see what looks good on your screen (we will look at how to deal with different screen sizes next week)

Nature!

Do you like nature? Great! As you walk around Skyrim you will quickly learn that nature here doesn't like you!

Discover what they mean by 'harsh environment' as you gleefully freeze in our snowy, cold region

Do you like spiders? Great! We have GIANT ones that will totally take you on in a fight. You won't even need to ask them, they will just run right at you! How cool is that?!

Testimonials

Try not to overthink it. They are just paragraphs.
